DataCart

Compact case with trolley system for Notebooks up to 16.4” and HP/Canon printer

The sturdy case and locks on the new DataCart ensure that your mobile computing equipment is protected perfectly. Your Notebook is well protected whilst in transit by the extra cushioning in the Notebook compartment. The Notebook compartment has also been increased so that it can now accommodate Notebooks up to 16.4&rdquo. in size. Documents can be stored in the usual manner in the document compartment and in the separate document pocket. This external pocket can be easily removed from the side of the case as required and used on its own. Two side pockets offer additional space for mobile accessories, such as a mobile phone, keys, pens etc. Power supply units can be stored in a specifically designed ABS box. All cabling runs predominantly concealed inside the case. All equipment is powered by a single cable via an opening in the left hand side pocket. Simply remove your Notebook to start working. Your printer is ideally fastened to the front flap with &ldquo. QuickFix&rdquo. printer mounting, which is an optional accessory. The printer flap has two push buttons attached to the sides so that it does not flap down when the case is opened. These can be easily released when in use so that the printer flap can be positioned. Your mobile office is especially convenient to move around with the integrated trolley system. The removable shoulder strap that is supplied can be used as an alternative transport solution.
